FDS-PT MIST SPRAYER: SIMPLE & DURABLE DISINFECTION

Now you can easily disinfect high touchpoint areas without saturating surfaces. Our new FDS-PT sprayer delivers a fine mist that will coat surfaces without over-wetting. The sprayer is easy to set-up, easy to use, durable and available with a choice of four tank sizes. Workers can manually move the sprayer from area to area using the top handle or it can be placed on an optional hand cart for greater mobility.

BENEFITS

- **Easy to use:** Plug and spray – pressurize the tank with compressed air, set the air regulator from 40 to 100 psi (3 to 7 bar), disconnect air line and go
- **Operator comfort and convenience:** Palm-fitting gun handle reduces fatigue and coiled tubing extends approximately 20 ft. (6 m) to facilitate coverage of larger areas without moving the tank
- **Durable:** Long service life – spray tip and pressure tank are stainless steel, spray gun is brass

IDEAL FOR

- Bathrooms
- Break rooms
- Conference/meeting/lobby areas
- Manufacturing work areas
- Office spaces

FDS-PT MIST SPRAYER
